OM KUMAR

Ghaziabad, Uttar Pradesh, India +91-7454014740 omrajora671@gmail.com LinkedIn GitHub Portfolio

PROFILE

Third-year Computer Science undergraduate with a strong foundation in Data Structures & Algorithms and hands-on experience across the MERN full-stack (React.js, Node.js, Express.js, MongoDB). Currently building skills in Artificial Intelligence & Machine Learning alongside coursework, with practical exposure to Python, SQL, and database design. Has independently designed and deployed multiple end-to-end web applications — including an AI-powered finance tracker and an e-commerce marketplace — combining clean UI development with backend and database integration. Eager to apply problem-solving skills and full-stack + AI/ML knowledge to real-world engineering challenges.

EDUCATION

Madan Mohan Malaviya University of Technology, Gorakhpur Sept 2024 – May 2028
B.Tech. in Computer Science and Engineering | CGPA: 7.76/10.0

PROJECTS

FinSight – AI-Powered Personal Finance & Expense Tracker

- Engineered a full-stack expense tracker using React.js, Node.js, Express.js, and MongoDB Atlas, supporting real-time transaction logging and categorization
- Implemented secure, multi-layered authentication with JWT, Google OAuth, and two-factor authentication (2FA), reducing unauthorized access risk
- Built AI-driven analytics module covering expense forecasting, anomaly detection, and a conversational chat assistant for personalized financial insights

GitHub: github.com/omrajora/finsight | Demo: finsight-gilt-phi.vercel.app

LocalKart – Digital Marketplace Platform

- Architected a full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB, supporting end-to-end product listing, cart, and order flows
- Designed Role-Based Access Control (RBAC) with separate Admin and Customer dashboards, enabling secure, permission-scoped operations and a responsive UI
- Built and integrated RESTful APIs connecting frontend, backend, and MongoDB Atlas for real-time data sync across the platform

SKILLS SUMMARY

Languages: C++, Python, JavaScript, SQL, HTML, CSS

Frameworks & Tools: React.js, Node.js, Express.js, FastAPI, MongoDB, MySQL, Docker, Git, GitHub

AI/ML: Machine Learning fundamentals, Data Analysis, Recommendation Systems, AI-driven Analytics

Core CS & Architecture: Data Structures & Algorithms (DSA), DBMS, Object-Oriented Programming (OOPs), REST API Design, JWT Authentication, Role-Based Access Control (RBAC)

KEY ACHIEVEMENTS

- Built and shipped 3 full-stack production applications independently, from architecture to deployment
- Actively engaged in coding competitions and technical problem-solving events
- Participated in hackathons, workshops, and team-based innovation events
